

Wyjoland has worked with leading animal health companies to develop and manufacture pharmaceuticals and nutritional products since 1988. Our commitment to quality, our manufacturing flexibility, and our responsive customer service have earned Wyjoland a solid reputation as a trusted, capable partner that understands the value of innovation in the animal health market.

Wyjoland's customers value our approach to:

- **Creating competitive advantage through innovation**
- **Achieving new cost savings**
- **Allowing you to focus on your core business**

Let's create synergy

STATE-OF-THE-ART MANUFACTURING FACILITIES FOR **POWDER**

In 2012, Wyjolab completed an expansion project that created a new GMP-compliant powder manufacturing facility and renewed two laboratories for quality control and development.

As a result of this expansion, Wyjolab is now even more capable of meeting the needs of customers in animal health industries quickly, efficiently and cost-effectively.

HIGH STANDARD OF QUALITY

- 2 production lines (CMS mixer or Lodige-type mixer) to offer the best choice in accordance to density and sensitivity of actives.
- Flexible batch size up to 3000L*
- Large storage capacities

INNOVATION

Powders "dust free"

Our team has developed highly-specialised industrial process to offer refined powder (gluing excipient).

This cold manufacturing process, which uses no solvent, offers many advantages as taste-masking or dust-free powders and preservation of all the actives' properties.

A WHOLE RANGE OF PACKAGING ALTERNATIVES SUITED TO EACH APPLICATION

..... Individual

..... Industrial

Single dose stickpacks

Bags

Doses of 25g to 1kg, ideal for lunch sachets.

Bags, pots, buckets, doypack,

Packaging largest up to 25kg with spoon dosing.

Bulk bags

up to 1000kg.

YOUR BENEFITS

- Custom packaging for individual or bulk quantities designed to deliver the correct dosages and maximize shelf life.
- Design and production of printed materials and secondary packaging (display racks, cabinets, point-of-purchase units).

**depending upon the characteristics of materials used in the formulae*
